Comments:

It is all good but I would love to see an update on the head restraint. I would like to see them swivel on their axis and I would like for the arms to pivot at their center to be able to accomodate different shape heads. The chief complaint I get and that I personally have, is by the end of a half hour c-spine session, the clamps become really painful and uncomfortable. Making both of the above changes would be very simple and easy. I would be happy to try any prototype in my office.
