56% to 70%				
41% to 55%				
Less than 40%				

Comments:

1 - Do not keep statistics. These are guesses! 2 - No active patients this time. 3 - Fewer patients with herniation since more are going for surgery, especially micro surgery. 4 - Patients who are helped are happy, those who aren't are neutral at best.

* The above data is not peer reviewed. It is the subjective response from a Physician grading their clinical results with the SpineMED® System.
