56% to 70%				
41% to 55%				
Less than 40%				

Comments:

It will be acceptable result if the treatment was low cost but because of the high cost of the machine the tx are high so the patient expectation are high so patient and doctor expectation are unsatisfied! Sorry.

* The above data is not peer reviewed. It is the subjective response from a Physician grading their clinical results with the SpineMED[®] System.
