

Name: Dr. Breitenbacher

	Overall outcomes* for :			
	Disc Herniation	Disc Degenerations	Sciatica Radiculopathy	Overall
86% or More				
71% to 85%				
56% to 70%				
41% to 55%				
Less than 40%				

Comments:

The outcome of SpineMED can be rated overall between 60-100% in category improvement of pain and movement with excellent clinical results especially in the patient group sciatic sensation, Protrusio/Disc hernia. Rather poor or not very satisfying results we noted in the group- advanced spinal stenosis. We preferred a regime of daily treatment max 20-25x with documented improvement started from 6-9 session in several times- the treatments were tolerated perfectly-

* The above data is not peer reviewed. It is the subjective response from a Physician grading their clinical results with the SpineMED® System.
