| Overall outcomes* for : | | | | |
|-------------------------|-----------------|--------------------|------------------------|---------|
| | Disc Herniation | Disc Degenerations | Sciatica Radiculopathy | Overall |
| 86% or More | | | | |
| 71% to 85% | | | | |
| 56% to 70% | | | | |
| 41% to 55% | | | | |
| Less than 40% | | | | |

Comments:

As far as pain goes - all of my patients are pain free. In 5 years, 2 ended up with surgery and 2 only got 40% improvement. Out of 1500 cases I have only had opportunity to do 20 or so follow up MRI's and some have had 1 - 4.5mm of improvement.

* The above data is not peer reviewed. It is the subjective response from a Physician grading their clinical results with the SpineMED® System.
