

Name: Palo Alto SpineMED - Charles Fulanovich

Overall outcomes* for :				
	Disc Herniation	Disc Degenerations	Sciatica Radiculopathy	Overall
86% or More				
71% to 85%				
56% to 70%				
41% to 55%				
Less than 40%				

Comments:

Results near 90% complete resolution of symptoms within an eight week protocol. All patients are carefully selected following current MRI review, including failed surgical cases. Long term resolution and stability are the rule, not the exception.

My protocol involves eight weeks with 3 X weekly visits and includes six minutes of deep tissue laser therapy (10 watt Litecure) prior to decompression session and is followed by spinal mobilization if indicated, using the Impulse IQ, a computerized mechanical instrument that uses pulsed forces equivalent to manual spinal adjustment.

* The above data is not peer reviewed. It is the subjective response from a Physician grading their clinical results with the SpineMED® System.

Dear SpineMED® Operator:

As part of our ongoing effort to continually improve the SpineMED® System, we are collecting clinical performance data from all users of the device.

Please complete this survey and fax it to 250-563-3177 or email a copy to info@spinemed.com.

Thank you for your support.

Best regards,

Tim Emsky
